

Eastbound Locals Freight Shunt @ Hornertown

Note:
The lead tracks do not normally have any cars stored on them

Objective:

Assistant Yard Master prepares Both Local Freights in one shunt without entering Classification & Arrival Departure tracks

Method:

Using the single shunt loco pull ALL cars on the Staging Eastbound track onto the Runaround track.

Using the industry tracks to build each consist

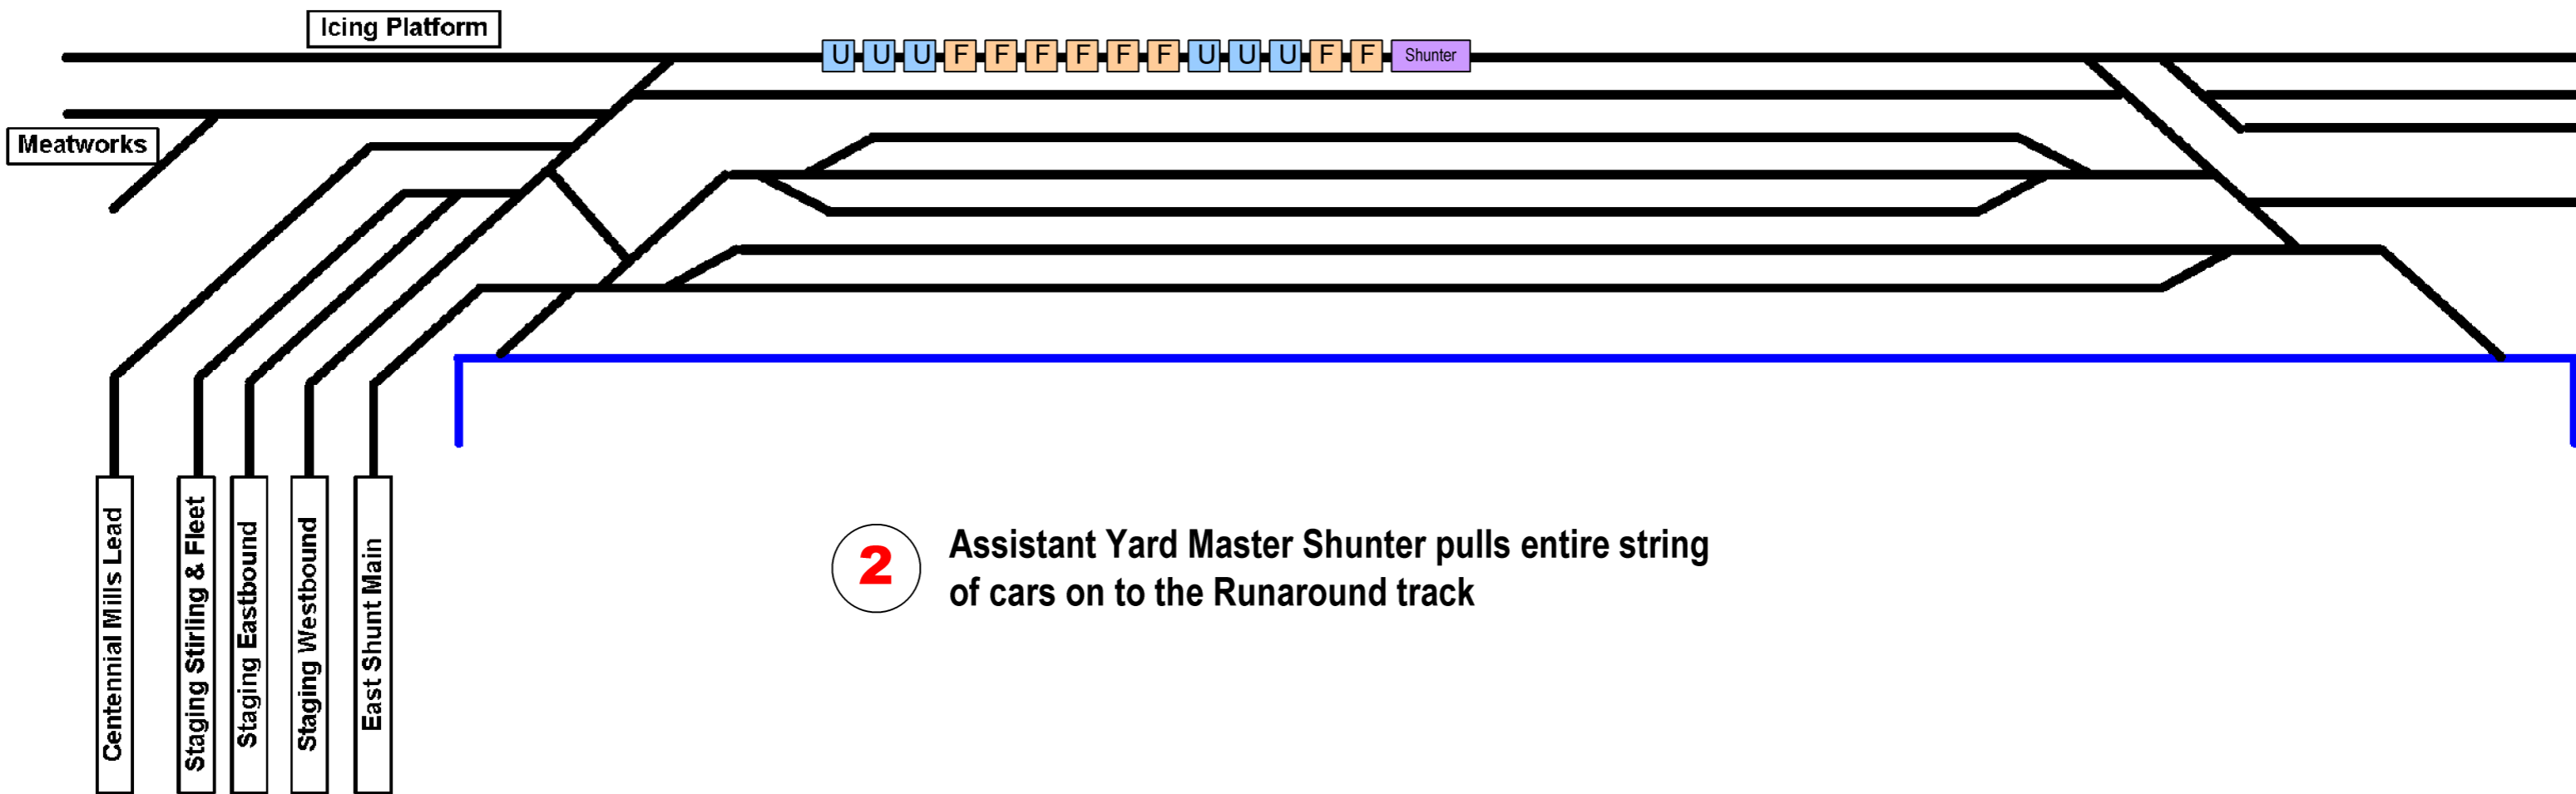

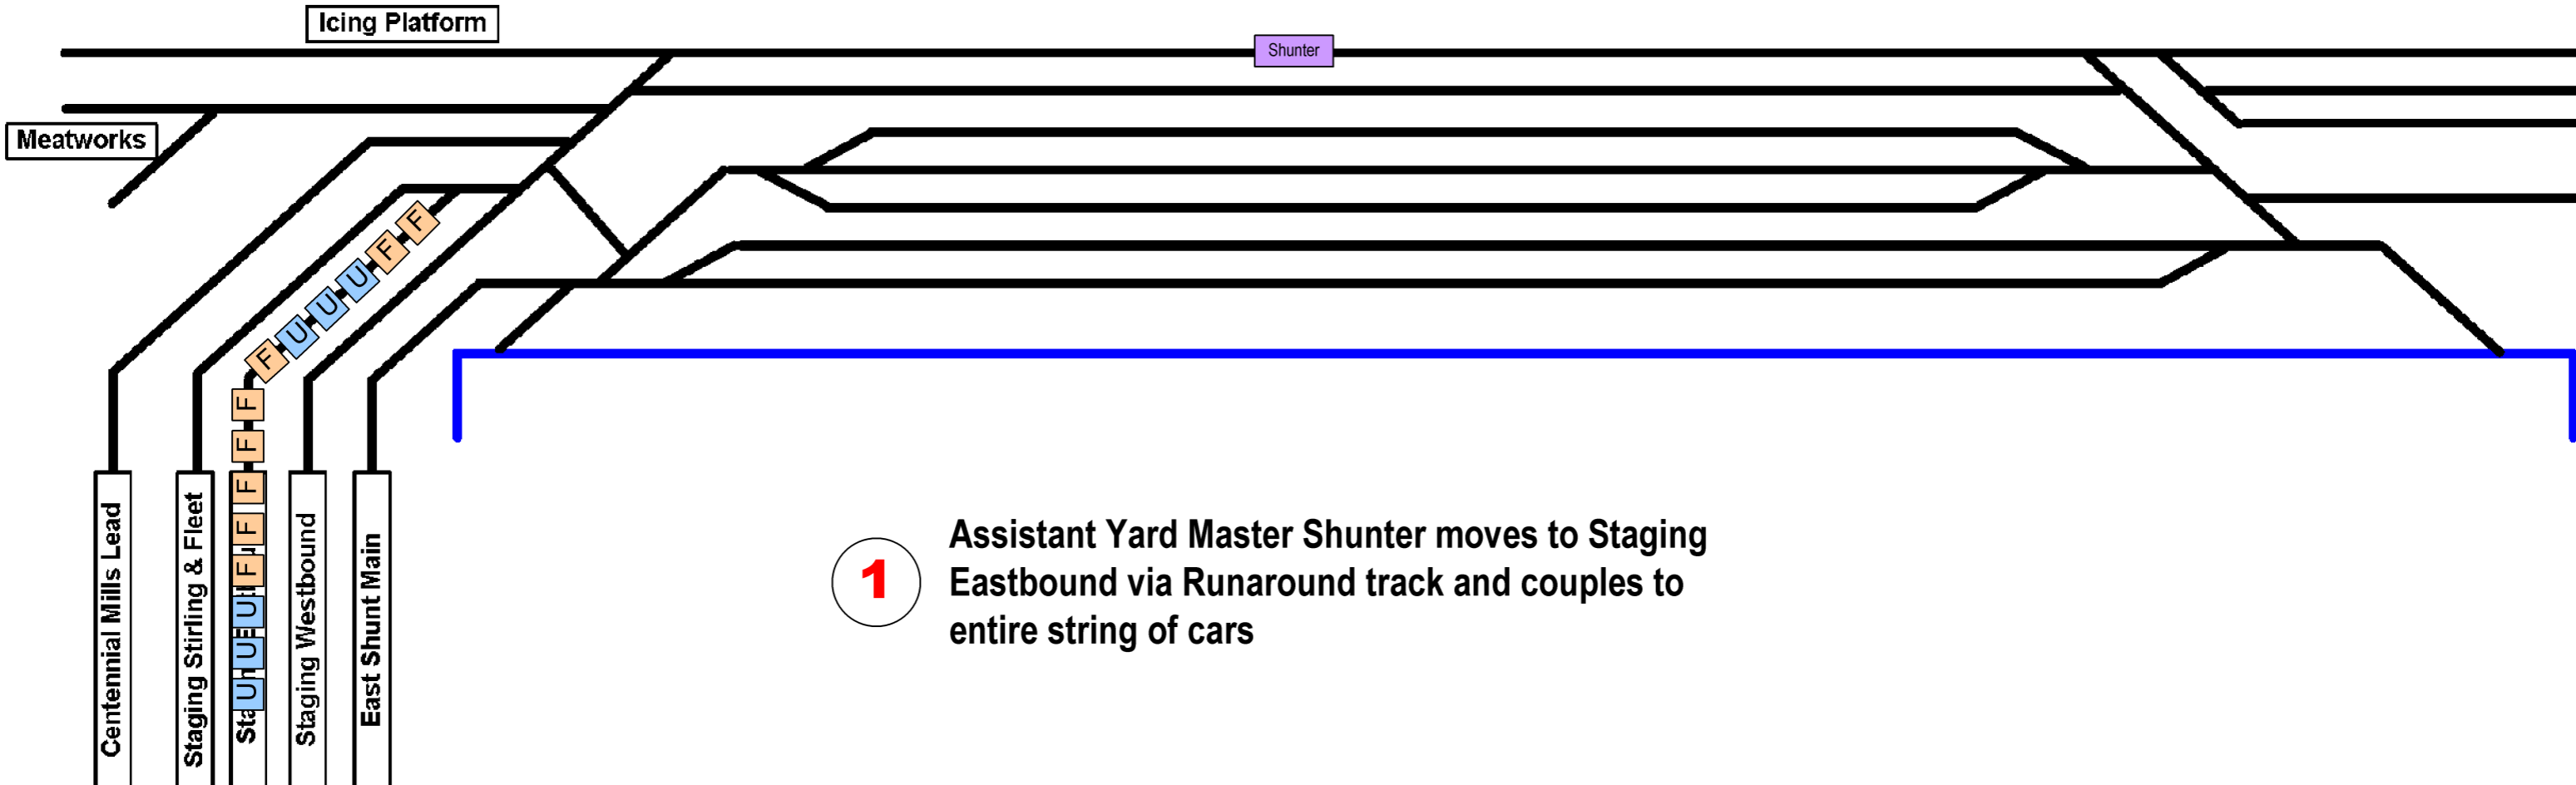

Flintston on the Meatworks lead

Upper Level - Jimtown, Adamsville, Iron Hill, Stanvac on the Centennial Mills lead

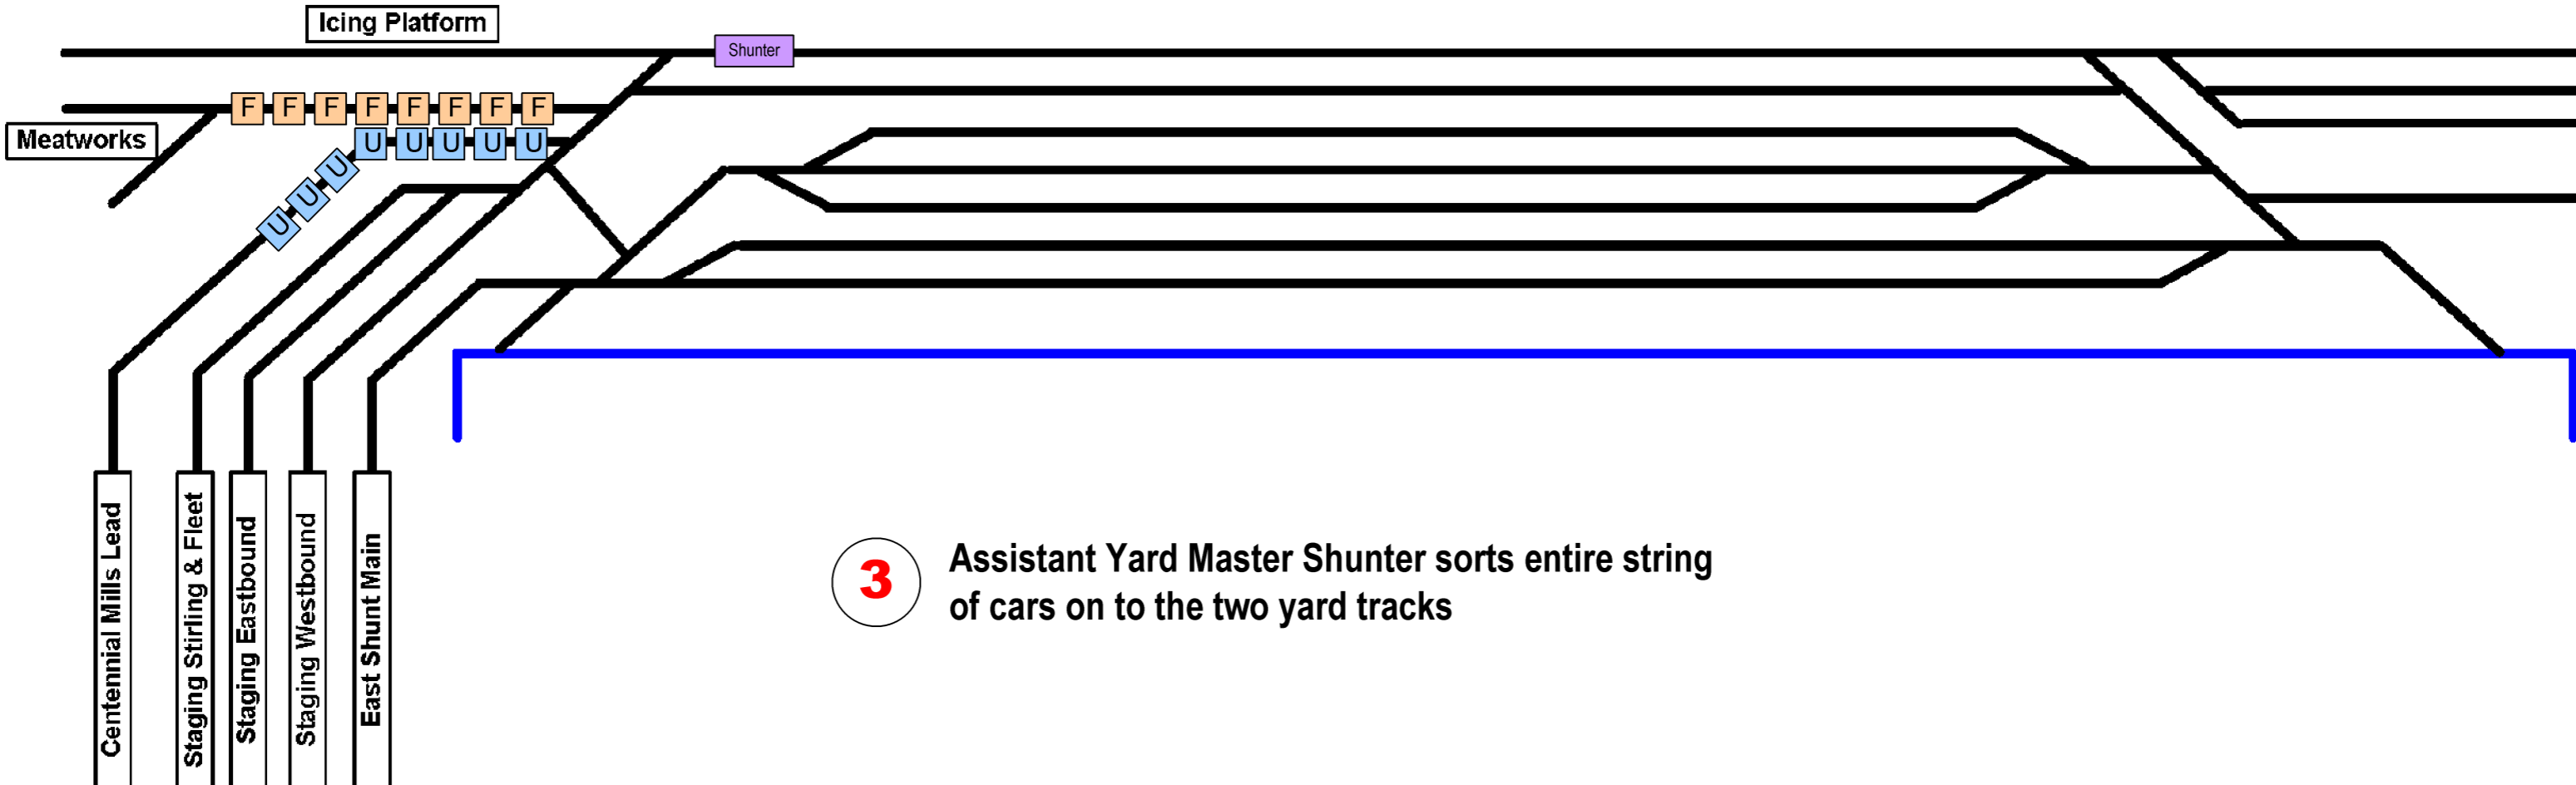

Assemble consists in order on Job card, pull to Runaround track then push onto East Shunt Main uncouple and return to Yard

Yard Master then places the two consists into the East Departure adds Cabooses ready for departure
